Existing Systems

There is **no single Bangladeshi platform that combines all these functions.**

Pieces exist separately:

- **BSCIC** – artisan and cottage industry support, but not a consumer marketplace.
- **Bangladesh Handloom Board** – handloom support only.
- **Aarong** – sells crafts but acts as an intermediary rather than connecting buyers directly to every artisan.
- **Daraz** – general marketplace, not heritage-focused.
- **Etsy** – global handmade marketplace, but not Bangladesh heritage preservation.
- **UNESCO Intangible Cultural Heritage** – documents traditions but is not a marketplace or training ecosystem.

This platform combines **preservation + commerce + tourism + analytics + training + research**, which is a much broader scope.
